

What is claimed is:

2

- A hook assembly of a door in a washing machine, comprising: 3 1.
- a pair of supporters directly extending from an inside of a doorframe of the washing 5 machine;
- a shaft penetrating the supporters; 6
- a hook rotatably coupled to the shaft wherein a head of the shaft penetrates the 7 doorframe to be externally exposed; and 8
- an elastic member provided in the doorframe to give an elastic force to the hook. 9

10

11 2. The hook assembly as claimed in claim 1, wherein the doorframe comprises separable inner and outer frames. 12

13

14 3. The hook assembly as claimed in claim 2, wherein the supporters extend from either the inner frame or the outer frame. 15

16

17 4. The hook assembly as claimed in claim 1, further comprising stoppers extending from the inside of the doorframe to prevent the shaft from being separated from the 18 supporters.

20

19

The hook assembly as claimed in claim 4, wherein the supporters lie between 21 5. 22 the stoppers.

23

24

6. The hook assembly as claimed in claim 5, wherein a distance between the

stoppers is greater than a length of the shaft. 25 26 7. The hook assembly as claimed in claim 4, wherein the doorframe comprises 27 separable inner and outer frames and wherein the stoppers extend from the inner and outer 28 frames, respectively. 29 30 The hook assembly as claimed in claim 4, wherein each of the stoppers 31 8. comprises a reinforcement rib provided to one side opposite to the other side supporting a 32 corresponding end of the shaft. 33 34 9. The hook assembly as claimed in claim 1, further comprising a grip having 35 one end rotatably connected to the shaft and the other end externally exposed wherein the one 36 end elastically turns the hook if the other end moves. 37 38 The hook assembly as claimed in claim 9, wherein both ends of the elastic 39 10. member are connected to the hook and the grip, respectively so that the hook is moved 40 together with the grip. 41 42 A washing machine comprising: 43 11. a cabinet having an entrance at a front side; a tub in the cabinet; a rum rotatably provided in the tub; and a door assembly coupled to the cabinet to open/close the entrance, the door assembly

44

45

46

47

48

comprising:

	a doorframe hinge-coupled to the cabinet;
	a pair of supporters directly extending from an inside of the
!	doorframe;
5	a shaft penetrating the supporters;
5	
S	a hook rotatably coupled to the shaft wherein a head of the shaft
5	penetrates the doorframe to be externally exposed; and
	an elastic member provided in the doorframe to give an elastic force
5 (to the hook.
57	
58	12. The washing machine as claimed in claim 11, wherein the doorframe
59	comprises separable inner and outer frames.
60	
61	13. The washing machine as claimed in claim 12, wherein the supporters extend
62	from either the inner frame or the outer frame.
63	
64	14. The washing machine as claimed in claim 11, further comprising stoppers
65	extending from the inside of the doorframe to prevent the shaft from being separated from the
66	supporters.
67	
68	15. The washing machine as claimed in claim 14, wherein the supporters lie
69	between the stoppers.
70	
71	16. The washing machine as claimed in claim 15, wherein a distance between the
72	stoppers is greater than a length of the shaft.

The washing machine as claimed in claim 14, wherein the doorframe comprises separable inner and outer frames and wherein the stoppers extend from the inner and outer frames, respectively.

18. The washing machine as claimed in claim 14, wherein each of the stoppers comprises a reinforcement rib provided to one side opposite to the other side supporting a corresponding end of the shaft.

19. The washing machine as claimed in claim 10, further comprising a grip
having one end rotatably connected to the shaft and the other end externally exposed wherein
the one end elastically turns the hook if the other end moves.

The washing machine as claimed in claim 19, wherein both ends of the elastic member are connected to the hook and the grip, respectively so that the hook is moved together with the grip.
